

Welcome

EIC EDGE – Week 4

Bringing It All Together

 **Develop**Intelligence

A PLURALSIGHT COMPANY

Capstone Requirements

See specific requirements at

https://github.com/KernelGamut32/capital_group_edge_la_public/blob/main/capstone/Capstone%20-%20Python%20and%20Database%20Requirements.pdf

Day-by-Day Breakdown

Day-by-Day Breakdown

| Day One | Day Two | Day Three | Day Four | Day Five |
|---|--|---|---|---|
| <p>Build a set of well-constructed user stories to capture project tasks for the week to define sprint for the week</p> <p>Begin build out of database definition in PostgreSQL</p> | <p>Continue project execution</p> <p>Complete database definition</p> <p>Begin API operations including automated unit tests</p> | <p>Continue project execution</p> <p>Continue build out of API operations including automated unit tests</p> <p>Validate code coverage % for automated unit testing as development proceeds</p> | <p>Continue project execution</p> <p>Complete build out of API operations including automated unit tests</p> <p>Verify target code coverage % for automated unit testing as development nears completion</p> <p>Begin CI/CD implementation in AWS</p> | <p>Complete project execution</p> <p>Finish CI/CD implementation in AWS</p> <p>Sprint demos</p> <p>Sprint retrospective</p> |

Wrapping Up

- In groups, discuss the following:
 - What are 3 – 5 key learnings coming out of the 4 weeks?
 - What are some practical ways that you can apply the material you've been learning about throughout this program in your day-to-day jobs?
 - How can you use what you've learned to positively impact your teams by providing a fresh and informed perspective?

Thank you!
